Minor Home Repair Program
Enabling people to remain safely in their homes as long as possible

Maintaining a healthy and safe home is difficult, especially on a fixed income. Minor Home Repair assists low- and moderate-income older adults and disabled homeowners by providing health and safety-related repairs that they cannot perform due to lack of funds and/or inability to physically perform the repairs themselves.

We offer the following services:
- Minor plumbing/sewer repair
- Select weatherization
- Minor carpentry
- Ramp repair/handrails/grab bars
- Limited roof repair
- Locks on doors/windows
- Door/window repair
- Smoke alarms/carbon monoxide detectors

Who may benefit from Minor Home Repair services?
Low- and moderate-income homeowners 62 and older or disabled homeowners 18 and older. Our program uses government grants and private donations to provide labor at no charge and materials free or at cost, depending on your income level. Donations are welcome.
